

US CENSUS BUREAU

Data Profiles of the North Carolina American Indian population

Prepared by Kelly Karres, Data Dissemination Specialist
Atlanta Regional Office of the U.S. Census Bureau
on behalf of the Commission on Indian Affairs
June 2012

Introduction

The following American Indian data profiles for tribes in North Carolina were compiled using data from the 2006-2010 ACS 5-Year American Indian and Alaska Native Tables (AIANT), which are collected by the U.S. Census Bureau's American Community Survey (ACS). The ACS officially replaced the long form of the decennial census in 2010. The AIANT is a new data product from the ACS which uses data aggregated over a 5-year period to provide more reliable estimates of detailed social, economic, and housing characteristics for many tribal population groups at multiple levels of geography. This data product is designed to mimic the detailed American Indian and Alaska Native Summary File from the Census 2000 long form.

This document contains profiles for the following North Carolina tribes: Coharie, Eastern Band of Cherokee, Haliwa-Saponi, Lumbee, Meherrin and Waccamaw Siouan. The population and corresponding statistics for tribal groups are based solely on the answers provided by survey respondents. Inclusion in this special data release requires survey respondents to have printed their enrolled or principal tribe in the write-in box *and* checked the box next to American Indian or Alaska Native race category. Respondents who met both requirements are included in the *American Indian alone* population category; respondents who met both requirements and *also* checked a box next to one or more other race categories, are included in the *American Indian alone or in combination with one or more races* population category. In addition to the data provided for the aforementioned tribes and categories, data for the total statewide population is also included. In this particular release, data for the Occaneechi and Sappony tribes are not available. Profile data for the Meherrin tribe is limited to estimates for *American Indian Alone or in combination category* only. Data for all tribes is expected to be included in the future American Indian and Alaska Native File from the 2010 Census.

Because the American Community Survey is collected from a sample of the population, and not the entire population, there is some error associated with the data. This error is demonstrated in the margin of error, published with these estimates in their original format. In the interest of space and ease of viewing, the margins of error are not included in the profiles. However, this information can be provided upon request.

It is important to note that total population and housing unit numbers, when needed specifically, should come from the most recent decennial census, or in between the censuses, the Population Estimates Program. In December of this year, the Census Bureau will release the American Indian and Alaska Native File from the 2010 Census which will provide total population and housing unit counts, by tribe.

This data table does not include the margins of error for the estimates.

* The total population in this table refers to the average estimated population between 2006-2010 using the Population Estimates from the Census Bureau. **The population counts from the 2010 Census by individual tribe will be released in December 2012.**

** The Alone or in Combination category refers to the population who are American Indian alone or American Indian *and* another race.

*** The poverty rate is the percentage of people and families that live below the poverty level.

65 years and over	(X)	10.7%	(X)	16.0%	(X)	14.9%

(X) denotes data points that are not applicable

This data table does not include the margins of error for the estimates.

* The total population in this table refers to the average estimated population between 2006-2010 using the Population Estimates from the Census Bureau. **The population counts from the 2010 Census by individual tribe will be released in December 2012.**

** The Alone or in Combination category refers to the population who are American Indian alone or American Indian *and* another race.

*** The poverty rate is the percentage of people and families that live below the poverty level.
